WORK EXPERIENCE

Frontend Developer at TeleSoftas

Lithuania (Remote)

1 year, 3 months

- Maintaining and implementing new features for WonderBorn Studios' platform; RaiseUpFaith. Technologies used; Vue, TailwindCSS, GraphQL, Amazon Cognito, and AWS Amplify.
- Maintained the internal Employee and Leave Management web applications used by all TeleSoftas employees. Technologies used; React, TypeScript, Redux, Material UI, and Gitlab on a CI/CD deployment.
- Writing clean, high-quality, high-performance, maintainable codes.
- Designed and implemented web applications along with 3rd party software integrations.

- Coordinate cross-functionality to ensure projects meet business objectives and compliance standards.
- Participates in peer code reviews.

Freelance Full Stack Developer

Lagos, Nigeria

1 year, 4 months

- Developed a blog which consists of CRUD functionalities. Utilized React JS, Redux, Styled Components for the frontend, and Express (NodeJS) to build the REST API for the functionalities and MySQL for the database.
- Developed the frontend and backend of a hotel's restaurant ordering system through the use of QR Codes.
 - Utilized NodeJS (Express) to generate the QR codes for the menus, MongoDB for the database and ReactJS for the frontend.
 - **Resulted to a contactless ordering solution to ensure social distancing at the hotel's restaurant.**

Software Developer at eTranzact

Nigeria (Remote)

10 months

- Led the development of the USSD service (*829#) for Nigeria's First Inland Revenue Service (FIRS) which is in use by more than half of Nigeria's population.
 - The USSD service retrieves tax related information for users.
- Single-handedly developed the service that integrates with RemitONE (UK based IMTO) to manage, validate, and route incoming Nigerian transactions to eTranzact's payment switch. Utilized Java, and Spring Framework.
 - Developed a cron job to fetch, validate beneficiaries and send transactions periodically.
 - **Resulted in a seamless inter-border money transfer from the UK to Nigerian beneficiaries.**
- Maintained and added new features to an existing microservice application that integrates with Payment Terminal Service Providers (PTSPs) via POS devices.
 - **Resulted in a reliable solution for money transfer, bills and VTU payment with POS devices via eTranzact agents.**
- Part of the team that developed the Admin service of eTranzact's Payment microservice application. Utilized ReactJS for the frontend and Spring Boot for the service.

Software Engineer at Neptune Software Group

Lagos, Nigeria

2 years, 9 months

- Developed new features for existing applications.
- Worked with team members to develop the frontend of the mobile banking application; AmjuMobile for AMJU Microfinance bank. Utilized Ionic Framework.
- Developed the frontend layer for all modules of Neptune's core banking application; OrbitLite. Utilized Java, Spring MVC.

Web Developer at Whitecroft Solutions

Port Harcourt, Nigeria

5 Months

- Developed websites using WordPress, HTML, JavaScript, and CSS.
